# Virology Lecture Notes

**introduction to virology - columbia university** - introduction to virology i. background/discovery the concept behind modern virology can be traced back to adolf mayer, dimitri ivanofsky and martinus beijerinck who, independently in the late 1880's, discovered what was later to be called tobacco mosaic virus (tmv). their **basic virology - indiana university** - basic virology w 1. consist of a genome, either rna or dna, that is surrounded by a protective protein shell (capsid). this shell often is surrounded by an envelope that consists of protein and lipid. w 2. they multiply only in living cells. totally dependent upon host cell organelles and energy. parasites at genetic level. origin of viruses w 1 ... **molecular virology lecture # 1: course introduction i ...** - molecular virology 4 lecture # 1: history early landmarks in virus research: d ate v irologist d iscovery late 1800's koch filterable agents, koch's postulates 1898 loeffler & frosch first demonstration of a filterable animal virus, foot and mouth virus 1901 reed identification of yellow fever virus **introduction to virology i: viral structure and function** - introduction to virology i: viral structure and function i. background/discovery the concept behind modern virology can be traced back to adolf mayer, dimitri ivanofsky and martinus beijerinck who, independently in the late 1880's, discovered what was later to be called tobacco mosaic virus (tmv). their **general virology i - kau** - □ general virology i introduction  $\frac{3}{4}$  virology is the study of viruses, complexes of nucleic acids and proteins that have the capacity for replication in animal, plant and bacterial cells.  $\frac{3}{4}$  to replicate themselves, viruses use up functions of the host cells on which they are parasites. **biology 1290b: an introduction to general microbiology. 1 ...** - biology 1290b lecture notes 1-7 2 key figures in the history of microbiology robert hooke (1635 - 1703) was a "polymath" he made many scientific discoveries in the 17th century, including making one of the first microscopes and also using a copy of one of leeuwenhoek's microscopes to see and draw details of the structure of plant cells **viruses and other acellular infectious agents** - viruses 1. list the types of approaches used to cultivate viruses, noting which types of viruses are cultivated by each method. 2. describe three direct counting methods and two indirect counting methods used to enumerate viruses. 3. outline the events that lead to the formation of a plaque in a lawn of bacterial cells. 4. **lecture 12: influenza - nceas** - lecture 7: influenza. the plague of athens (may have been the flu) • the plague of athens - early years of the peloponnesian war ... a bit of virology - antigenic shift • co-infection of a single host, such as swine (implicated in 1957 and 1968 pandemics) - simple segmented rna allows for big "swaps" and **lecnote fm degree and diploma med bacteriology** - lecture notes degree and diploma programs for environmental health students medical bacteriology abilo tadesse, meseret alem university of gondar in collaboration with the ethiopia public health training initiative, the carter center, **ibiology i lecture outline 7 viruses - dsc** - biology i lecture notes 7 viruses . references (textbook - pages 355-362. lab manual- pages 273 -274) textbook definition of virus = a non-cellular parasitic agent consisting of an outer capsid and an inner core of nucleic acid . an enigma . 1. our textbook calls viruses a biological enigma. why? (dictionary definition of enigma = puzzle, riddle ... **mlab 1331: mycology lecture guide - austin community college** - mlab 1331: mycology lecture guide i. overview of mycology a. importance of mycology 1. introduction mycology - the study of fungi fungi - molds and yeasts molds - exhibit filamentous type of growth yeasts - pasty or mucoid form of fungal growth 50,000 + valid species; some have more than one name due to minor **structors ntroduction - department of biochemistry** - lecture notes: a set of lecture notes will be provided each day in class. these notes will also be posted on the 575 website at canvas for color printing. although the handouts ... fields virology, 6th edition, 2013 d.m. knipe, p.m. howley et al. (eds). **review of the previous edition elliott, casey, lambert ...** - (lecture notes) medical microbiology and infection is a concise text covering all aspects of basic science through to the clinical aspects of diagnosis and management - it is invaluable." medical student, hull-york medical school medical microbiology lecture notes is ideal for medical students, junior doctors, **transcription and rna processing - virology** - transcription and rna processing lecture 7 biology 3310/4310 virology spring 2017 it is possible that nature invented dna for the purpose of achieving regulation at the transcriptional rather than at the translational level —alan campbell **plant virology (pohl 7040) - louisiana state university** - plant virology by r.e.f matthews will be useful. this book covers the topics of the course and much more. this book and other plant virology books will be available in the laboratory (a455). but please do not remove any book from the laboratory. a summary of lecture and lab topics will be provided. occasionally, changes will be made to **lecture 1: virus history - nptel** - nptel - biotechnology - general virology joint initiative of iits and iisc - funded by mhrd page 4 of 18 lecture 2: virus diversity viruses are minute, non-living entities that copy themselves once inside the living host cells. **reverse transcription and integration - virology** - reverse transcription and integration lecture 9 biology 3310/4310 virology spring 2017 "one can't believe impossible things," said alice. "i dare say you haven't had much practice," said **viruses - mit opencourseware** - general properties of viruses • replicate independently of the chromosome of cells, but dependent on cells • infect animals (and people), plants, and bacteria (bacteriophage) • extracellular forms (virions) are metabolically inert • contain either dna or rna • range in size from about 28 nm to about 200 nm in diameter **for medical laboratory technology students - cartercenter** - circumvent these problems are developing of lecture notes on various subjects. therefore, this lecture is developed to fill the existing gap and strengthen the teaching -learning processes. this lecture note

---

is primarily prepared for medical laboratory technology students pursuing their studies at bachelorrates

**virology lecture 2 - med study group - blog** - virology lecture 2 today's lecture is about the encephalitis and rabies. first we'll talk about ... bacteria, fungi, rickettsia as well as viruses can cause encephalitis but in today's lecture we're concerned only with viruses. viral etiology ... thanks to sally khateeb for her notes, they were very helpful. done by: mohammad dmour good luck ... **swartz microbiology notes - hcc learning web** - swartz microbiology notes 1 chapter 1 the main themes of microbiology the scope of microbiology microbiology is the study of microorganisms which are too small to be seen with unaided eyes and have to be visualized with a microscope. microorganisms include bacteria, viruses, fungi, protozoa, algae and helminths (fig. 1.2, p. 3). **principles of virology - new mexico state university** - virology biology 475 (3 credits) biology department, new mexico state university, spring 2016 ... lecture notes posted on canvas will contain substantial omissions of actual material presented in class, thus downloading the notes is not a substitute for attending lecture. **mec evaluation for dms i immunology & virology** - virology narratives: notes • "the text is just right. i've said it before, but the notes were terrific! great job with the notes." • "the lecture notes and tables were very thorough and definitely helpful when it came time to study for quizzes and exams." • "standardize the notes. details were buried in the text and it **part 1 - axón** - medical microbiology and infection lecture notes, fifth edition. edited by tom elliott, anna casey, peter lambert and jonathan sandoe. 2011 blackwell publishing ltd. published 2011 by blackwell publishing ltd. a characteristic feature of gram-negative bacteria **clinical and diagnostic virology - cambridge university press** - nurses and other healthcare workers working in infection-related specialties (virology, microbiology, infectious diseases and public health). it will also be useful for medical students and other healthcare professionals **immune system and immunology - helmberg** - immune system and immunology arno helmberg. these lecture notes accompany my lectures on immunology in the study module "infection, immunology and allergology" at innsbruck medical university. the english version serves two purposes: as a learning aid for international students and to encourage german-speaking **messages text principles of virology** - information, supplementary readings, lecture notes, and exam keys will be posted on this site. note that lecture notes posted on blackboard will contain substantial omissions of actual material presented in class, thus downloading the notes is not a substitute for attending lecture. **lecture # 1: c - purdue university** - lecture format: • a. lecture with ... questions of you - 2. texts • viruses and human disease (strauss & strauss) 2002 • fundamentals of molecular virology ... virology (flint, enquist, krug, racaniello, skalka) 1999 -not required but good reading and diagrams - 3. lecture notes: will be available as pdfs on **medical microbiology syllabus - med-edrginia** - necessary information for successful completion of this course, including links to the following: lecture notes, weekly quizzes, tutorials, practice exams, and laboratory/small group information. the website will be updated throughout the course as new resources are necessary, and is considered to be the most up-to-date reference **the biology of viruses - uw-madison** - the lecture notes are not intended to substitute for the lecture presentation itself nor will they include every detail discussed in class. thus, student attendance during each class is important. regular attendance is required and is a prerequisite for success. recommended textbook: principles of virology, 3rd edition, 2009. s.j. flint, l.w ... **molecular techniques lecture notes 2013** - 0.0 lecture notes section day of coverage molecular techniques lecture notes 2013 by dr. david ng advanced molecular biology laboratory michael smith laboratories university of british columbia ... by lecture day before the start of workshop, please read appendix a (on replication) monday **virology course overview 1. teaching activity ...** - virology course overview 1. teaching activity identification the advanced virology course is an optional subject in the biology degree that will be offered in the third three-month period of the year. the number of places for this course is 48. 2. coordination and teaching staff **virology syllabus (mcb 4503) day/time: m/w 11:00 am- 12:15 ...** - virology, some notions may not be current due to the rapid development in this field of study. therefore, ... reproduce or propagate lecture notes or outlines for the purpose of sale. students with disabilities: university and college policies specify that all programs are open to **chapter 13 viruses, viroids, and prions - ivcc** - chapter 13 viruses, viroids, and prions biology 1009 microbiology johnson-summer 2003. viruses virology-study of viruses **medical virology learning tables** - medical virology learning tables please note this table is not all inclusive! it serves to highlight the tremendous variety of viral infections and outcomes. virus major disease major route of transmission confirmation of infection\* pathogenesis (over simplified) vaccines anti-viral therapy long-term consequences poliovirus +ss rna poliomyelitis **hepatitis b - bioch.ox** - distinguished lecture in virology program hepatitis b the first cancer vaccine 30 november 2006 oxford university museum of natural history. 1. hbv is a common infection ... location before after notes china, regional study 16.0% 1.4% hbv carriers usa, cdc 260,000 78,000 total hbv cases usa, alaska 215 7-14; 1993 native americans. acute **general microbiology fact sheet** - general microbiology fact sheet pathogen genus species disease risk group host range transmission signs & symptoms incubation fact micrograph bacteria actinomycetes spp. actinomyces israelii actinomycosis 2 humans, cattle, horses person-to-person by contact of mouth, aerosols, fomites. opportunistic pathogen. chronic bacterial **action plan for virology 2013 - geiselmed.dartmouth** - • update/edit notes; ensure lecture content and notes are in agreement (specific to virology) the faculty will engineer complete ibooks (notes + slides) for all virology material. based on student preferences, powerpoint slides will be also provided to the students along

---

with .pdf versions of the materials. **virology mcb 4503-b51 florida international university ...** - the virology mcb 4503 is designed to facilitate your understanding of the world of viruses. special ... obtaining lecture notes and in-class announcement information from fellow classmates. • all electronic communication equipment (i.e. phones, computers, i-pads) must be **medical virology syllabus 6-24-13 - university of cincinnati** - medical virology 3 credit hours pmm 6002 (undergraduate and graduate students may enrolled in this course) tuesday / thursday from 4:00 to 5:30 (location to be determined) lecture topic reading assignments (lecturer) 1 course introduction; brief history of virology 1 2 viral structure and replication i 3-4; appendix i **biol f460 principles of virology syllabus - bwf** - this course will explore current concepts in the field of virology, with emphasis on the structure, genetic material, and replication strategies of various human and animal viruses. in addition, mechanisms of viral pathogenesis, viral diagnostics, prevention and treatment of viral infection will be presented. lecture + lab + other: 3 + 0 + 0 4. **virology mcb 4503 and mcb 5505 \*\*syllabus subject to change\*\*** - virology mcb 4503 and mcb 5505 **\*\*syllabus subject to change\*\*** course description : this course is for upper level undergraduate students and graduate students. it is designed to introduce you to the field of virology, teach you the components of viruses, their replication schemes and how the
