
Virtual Momentum Lab Answers

virtual momentum lab (alternate) - washoeschools - virtual momentum lab (alternate) directions: complete each section of the activity. you will turn in the assignment to your teacher at the end of the lesson. remember that for perfectly elastic collisions, the product of the mass of the first object and its initial velocity plus the product of the mass of the second object and **physical science virtual momentum lab day one** - physical science virtual momentum lab day one directions complete each section of the worksheet while using the virtual momentum lab. review the following equations for perfectly elastic and perfectly inelastic collisions. in a perfectly elastic collision, the following equation holds true: $m_1v_1 + m_2v_2 = m_1v_1' + m_2v_2'$ **momentum virtual lab - chippewa falls middle school** - virtual momentum lab momentum (kg*m/s) = mass (kg) * velocity (m/s) ... explain why momentum has to be conserved in any type of collision. 13. explain why a train that is moving very, very slowly has many times the ... momentum of a bullet traveling very, very fast. title: microsoft word - momentum virtual labc author: slowiatj created date: -.36 1.50 3.12 .87 3.27 0.32 -.01 -0 - yola - momentum and simple 1d collisions phet lab introduction: when objects move, they have momentum. momentum, p , is simply the product of an object's mass (kg) and its velocity (m/s). the unit for momentum, p , is kgm/s. during a collision, an object's momentum can be transferred to **physics name: momentum lab pledge: i have neither given ...** - physics name: ____ momentum lab pledge: i have neither given nor received unauthorized help: ____ objective. to investigate elastic and inelastic collisions. ... perform your own calculations for momentum and kinetic energy showing all your work: equations and answers. elastic collision i. (set e at 1) **gigaphysics: conservation of momentum** - the conservation of momentum part i: open the lab in your web browser (mobile phones not recommended), navigate to gigaphysics, then click virtual labs in the heading bar and conservation of momentum from the list of labs. if you're using a computer that **lab: conservation of momentum - scritonscience** - if the velocity is negative, the momentum also will be negative. in this virtual lab you will compare the velocities and momentums of two vehicles before and after a collision by using experimental data from collision tests at an accident reconstruction center. **name per due date mail box rolling momentum lab** - name ____ per ____ due date ____ mail box ____ (1 pt for complete header) rolling momentum lab today in lab, we will be experimenting with momentum and measuring the actual force of impact due to momentum of several rolling objects. you will be rolling these objects down a ramp into orange solo **phy191 experiment 5: elastic and inelastic collisions 8/12 ...** - phy191 experiment 5: elastic and inelastic collisions 8/12/2014 page 3 in this experiment you will be dealing with a) a completely inelastic collision in which all kinetic energy relative to the center of mass of the system is lost, but momentum is still conserved, and **answer for virtual physics lab - oldgoatfarm** - answer for virtual physics lab use an air hockey table to investigate simple collisions in 1d and more complex collisions in 2d. experiment with the number of discs, masses, and initial conditions.
